TABLE OF CONTENTS

For over 30 years, Industrial Ventilation Systems has set the industry gold standard for engineered air moving systems and cemented our imprint in the industrial market, with a strong presence in the oil and gas industry. No other company in the industry can match IVS's innovation, value, and service.

From concept to completion, our team of highly experienced engineers, fabricators, and technicians are with you every step of the way to ensure the highest quality product and on time delivery.

Proudly manufactured in the USA, IVS analyzes and designs the most cost effective system for the job. World class customer service and customer satisfaction are the core foundations of IVS's culture and that is why we continue to be the trusted champion of the industry.

***"It's very easy to be different,
But very difficult to be better."***

WHY CHOOSE US

■ WE STAND BEHIND OUR PRODUCTS

Our products are tested and tested again from the moment they hit our production floor until final packaging. We have a zero tolerance policy for anything that will affect the quality of our product.

■ WE ARE ACCESSIBLE

From conception at the most basic level to final field commissioning, we are with you every step of the way. Our world class customer service is unmatched.

■ IN HOUSE ENGINEERING & DESIGN

Our greatest strength is in providing turnkey projects to our customers. We are familiar with API, NFPA, NEC, OSHA, and FERC standards as they relate to our customer's tough industry challenges.

■ PROUD PRODUCT OF THE USA

Located in the heart of Texas we take pride in the ability to manufacture all of our products in the United States and offer an industry best 5 year limited warranty.

Each phase of our company is dedicated to customer satisfaction, quality assurance and the pursuit of continuous improvements.

OUR MISSION

*"There are no traffic jams
along the extra mile."*

Industrial Ventilation Systems has full in house engineering, acoustical analysis, design, and CAD capabilities. Our sales and engineering team are highly familiar with API, NFPA, FERC, and OSHA standards as they relate to our customer's tough industry challenges. Therefore every design, every system, every component is carefully chosen and engineered for each specific application.

From turn-key to retrofit, our vast array of integrated systems and components can and will fit the bill. With our line of powered systems, passive systems, sound attenuated systems, and our packaged air handling systems, there is no job too big or too small for our team. Regardless of any project specific requirements and limitations, we can design it. If it's needed, it can be done.

PRODUCTS AND SERVICES

PROJECT PHASES

Requirement

Evaluate each project as job specific to ensure we meet our customer's needs.

Engineering

In house engineers analyze job requirements to propose the best solution to meet our customer's needs.

Development

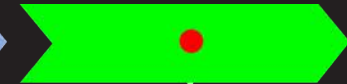

Designers begin planning and creating engineered systems for customer's approval.

Production

Execute manufacturing and procurement plan based on customer's expectation.

Delivery

On site, On time!

SIGNATURE SERIES FAN

Industrial Grade Chassis

Unlimited Propeller Selection

Cast Iron Severe Duty Motor

IVS strongly believes that perception is reality. From the selection of raw materials, technical components, and experienced staff; IVS uses only the highest of standards to achieve our level of quality.

- Unlimited range of configuration based on application performance.
- Blades available in anti-static PAGAS, composite PPG, composite PAG, or spark resistant cast aluminum
- High-strength die cast aluminum hubs
- Motors available as TEFC standard, TEFC Severe Duty, and Explosion Proof
- Rigid industrial grade structure for mounting
- Custom rolled orifice panel
- Available in stainless steel

"Things of quality have no fear of time."

Vibration Analyzed

Integrity Verified

Quality Certified

Our panel fans incorporate rigid frame structures which have been developed and continuously revised through sophisticated vibration analysis software and modeling for air assurance.

SIGNATURE SERIES FAN

"Design simplifies complications."

For over 30 years, IVS has been specifying, designing and building packaged air handling units. Our air handling units can be integrated vertically or horizontally to address various industrial specifications or requirements.

Designed with all welded tubular frame and double wall construction, our units will provide years of trouble free service. Options include standard or explosion proof components, electric, steam, hot water, hot oil heating, or chilled water cooling.

Our 100% outside air draw through air handling unit fitted with an ASTM E477 sound attenuator will provide all the heating or cooling you need and trap noise from your process preventing it from disturbing your neighbors.

AIR CONTROL

VERTICAL AIR HANDLING UNIT

Our packaged air handling units are constructed with heavy gauge galvanized steel with the option to match most any specified paint color per the project requirement.

Each interior component is carefully selected by our engineering team to assure peak performance, compliance with the specs, and ease of mind. As with all of IVS systems, these units come with an industry best 5 year limited warranty.
